

How can
we stay
safe
online?

We found that that the most popular games are Minecraft and Roblox, but some people are playing games that have an older age rating than the age we are. Also, some children are watching other people play the 15 or 18 rated games too.

As we are school council, we want you to keep safe and you can do this by:

- Check the age rating on the game you want.
- On Roblox, settings to adjust what you can do (e.g make it so you only get games that are age appropriate).
- Only chat to people you know in real life.
- If there something that scares or worries you, tell a grown up or a trusted guardian.
- You can also report using the report button
- If you use YouTube, you can download YouTube Kids so that you don't see anything disturbing on normal YouTube.
