

## Willow Class Spring 1

Wonderful weather has been a great topic to do this time, as we certainly have had all sorts of weather to look at! It has been a busy but fun filled 6 weeks where the children have learnt all about the different types of weather.

In English we looked at the Percy the Park Keeper story, 'One snowy night' and the children wrote a fantastic piece of writing about a new character they thought of. We have also read the story of Noah's Ark and written amazing diary entries pretending to be Noah. The Noah's Ark story also inspired the children to build their own ark outside using the big bricks and other such materials. We had the fabulous poet Matt Goodfellow to visit and inspired us to write our own poems about weather.

In Maths, Year 1 have learnt about place value up to 50 and how to partition numbers into tens and ones. Reception have learnt everything to do with numbers up to 8 and had a go at combining two groups of numbers together. We had great fun on our Number day and made some fantastic number hats.

In Science Willow class learnt about habitats and we went on a fun habitat walk around our school. We have also learnt about classifying animals into the 6 main groups: mammals, insects, birds, fish, amphibians and insects. As part of Geography, we have taken a closer look at hot and cold climates and the animals that live in those conditions.

In P.S.H.E Willow class have looked at the importance of money and why we need it, how to keep it safe and the children have talked about spending and saving money.
