

## Pollution Solution

This term we have enjoyed exploring our topic 'Pollution Solution'. We have been busy thinking about our big question 'How can we make a difference to our world?'. In English, we investigated Earth's plastic problem through stories like 'A Planet Full of Plastic', 'Somebody Swallowed Stanley' and 'Clean Up!'. We have been thinking carefully about where all our rubbish and plastic ends up. We have created our own posters to encourage people to think about their plastic use and we even wrote letters to Mrs Brown to encourage her to use less plastic in our school. We felt very passionate about this!

Our eco learning has extended into our Design and Technology lessons. We have recycled materials from our homes and turned them into cushions! We thought carefully about our designs including what thread colour to use and how we can put applique on our designs.

In Science, we have been learning about plants. We have enjoyed looking at the different parts of a plant and how they work. We have also investigated how the stem in a plant works by using food colouring in the water pots. We have explored what plants need to grow and as part of our Spring Fair project, we have grown peas, carrots, peppers, flowers and much more!

In PE we have been practising our coordination skills with different equipment! We have practised this through hockey and tri-golf. We have enjoyed dribbling, aiming, shooting and chipping in the sunshine.

Lastly, but certainly not least! We had an AMAZING time on our Conkers trip. We learned even more about recycling and how to look after our earth. We explored composting and how effective worms are at this! We even had a go at making our own wormery!
