

## Somerby School PE and Sports Funding Review 2013-2014

A wide range of PE has been delivered at Somerby Primary School during 2013-2014. The children participated in a variety of activities in competitive and non competitive environments.

The impact of our PE and Sports Premium funding can be seen in the development of the children and their attitude to sport. The children have experienced high quality lessons that have enhanced their experiences of PE at school. They have gained an enthusiasm for many different sports and gained knowledge of these sports that has impacted in their own life. Many children are more active at playtimes and play an increasing number of sporting games and choosing to peruse sports clubs outside the ones provided for by school.

In addition to this the school also offered out of school sports activities twice a week, this catered for children of all primary school age. The clubs were extremely successful and encouraged many children who were not physically active outside of school hours to increase their physical activity in a safe, secure and fun way.

Teaching staff at Somerby Primary school were also able to learning new teaching skills, styles and increase their knowledge and awareness of different sports. This has supported staff as they deliver high quality PE lessons to all.

Somerby School have also invested in outdoor play equipment. This play equipment leaves a legacy from the 'Sports Funding' that will benefit every child in school for years to come. The new Trim Trail has been eagerly received by the children and they actively play on it every day during break times, lunch times and after school.

PE and Sports Premium Funding 2013-2014 - £8100
